WALK-IN-HUMIDOR

# CIGARS

A walk-in-humidor must meet three requirements. It must maintain the cigars in perfect condition, satisfy the most stringent demands from the aesthetic aspects and provide the cigar connoisseur with an uninterrupted view of the objects of his desire.

For 30 years **ladenbau ag** has been planning and building humidor display cabinets that meet these requirements to perfection. For sales rooms and private homes. The display cabinet is designed and planned in close cooperation with the client, manufactured at the company's own modern workshop and assembled on site by specialists.
